**DESCRIPTION :**

The PYRGARD Non-coded Fire Alarm Stations are sturdy, attractive and designed for economical installation. It provides a single action, break glass initiating station. It is available with normally open (N.O.) or normally closed (N.C.) contacts. It has screw terminals for field connection. Powder coated body in International Fire Red color.

The pull of the lever sounds an alarm on all pre-signal indicating devices. The PYRGARD station are designed either flush or surface mounting. For flush mounting a 4" square box with single gang plaster cover should be used. For surface mounting either cast or steel box should be used for enclosure.

**WARNING:** These devices will not operate without electrical power. As fires frequently cause power interruptions we suggest you discuss further safeguard with your local fire protection specialist.
