

Smoke Detectors are devices provided on fire alarm initiating circuits to automatically detect fire by sensing smoke particles. The PYRGARD S802 Photoelectric Smoke Detector have the following features :

Main Feature:

Light Labyrinth with High Stability

Adopted CMOS with low power consumption

High Adaptability to the Ambient, with Dust-proof, mothproof, moisture proof and anti-white light function

DC12-32V Input Voltage

Orientation differences: $M_{max} \circ M_{min} < 1.6$

Double LED indicator

Unique bracket design, easy installation

Standard: **GB.4715-2005 & U.L. Listed 217-2007**

Technical Specification :

Input Voltage: 9V-12VDC

Static Current: 60-90uA at 24VDC; 20-40uA at 12VDC

Alarm Current: 60-90mA at 24VDC; 20-40mA at 12VDC

Operating Humidity: 95% RH

Operating Temperature: -10°F - +55°F

Detecting area: 60 square meter (with 4 meter height)

Model : PYRGARD-S802

Mounting Base

Detecting Sensitivity : 2.0dB or 10% / 50cm

Dimension : 100mm x 40mm

Wiring Mode : Non-polar

Ceiling Mounted
